# HELLO, RESEARCHER

**In the Považie region, five works of art await you, each with an interesting story to tell. Grab your notebook, set off on an adventure and discover something new at every stop.**

## How do you take a print?

1. At each stop, find something interesting in nature, such as tree bark, a leaf or another surface with an interesting pattern.
2. Press some modelling clay onto it
3. Then paint the modelling clay with your favourite tempera paint and press it into your notebook
4. Ta-da! Its pattern will appear on the paper!

PS: If you don't have any modelling clay, cover the relief with paper and rub it with a pencil

Look, explore and let your imagination run wild! Every imprint will be unique, just like the places you'll discover.

Remember, we don't damage nature. We only take beautiful memories and imprints away with us!

---

LANDMARKS / STOPPING POINTS IN THE COUNTRYSIDE is a series of site-specific artistic interventions situated in the Považie region, near cycle routes and footpaths, which respond sensitively to the specific location and explore the relationship between the landscape, memory, movement and the contemporary perception of the environment. LANDMARKS thus links art with the exploration of the region and invites visitors to discover familiar places from a new perspective.
